SKILLS

- **Libraries and Frameworks** : Flutter, Firebase, Node.js
- **Tools** : Android Development, Git, REST API, Xcode, CI/CD, iOS Development

EXPERIENCE

Flutter App Developer

[Codibex](#)

 Jul 2022 - Present  Noida(Remote)

- Delivered and maintained production-grade mobile and web applications across diverse domains, including **staff management, dating, food delivery, and real estate**.
- **Scalable Architecture**: Designed and maintained robust, modular codebases using **FlutterBloc**, **GetX**, and **Provider**, adhering to **SOLID** and **clean** architecture principles.
- **Cross-Platform Expertise**: Shipped performant and responsive apps for **Flutter Web**, **Android**, and **iOS**, optimizing for platform-specific behavior and UX.
- **Advanced Integrations**: Integrated complex **REST APIs** and **third-party** SDKs to power real-time updates, payments, and authentication flows.
- **Modular & Reusable Components**: Built plug-and-play modules for payment (**Razorpay**), subscriptions (**RevenueCat**), and analytics to reduce dev overhead across projects.
- **Project Ownership**: Independently handled **3-4 concurrent projects** end-to-end — from architecture and implementation to testing and release — in collaboration with backend, QA, and design teams.
- **CI/CD & DevOps**: Automated build and release pipelines via CodeMagic, improving release frequency and reducing manual intervention by over **70%**.
- **Code Quality & Collaboration**: Regularly conducted peer code reviews, enforced best practices, and provided architectural guidance to ensure high-quality, maintainable code across teams.

PROJECTS

[DeepVid AI Video Generation App](#)

- Built and launched a powerful AI video generation app in just **18 days**.
- Enabled users to generate videos from text prompts using **advanced generative AI pipelines**.
- Implemented **Server-Sent Events (SSE)** for real-time processing updates and responsive UX.
- Integrated **RevenueCat** for handling subscriptions across Android and iOS platforms.
- Published the app on both **Play Store and App Store** with full compliance to AI content regulations.
- Achieved over **40K+ users** and **\$5000/month** revenue organically within the first **3 months** of launch.

[Student Tribe](#)

- Created a social networking platform for students and college communities with **100k+ downloads**.
- Built key features like **media posts, likes, real-time chat, event updates, and push notifications**.
- Enabled students to **purchase event tickets, apply for internships** within the app.
- Achieved a **4.6 Play Store rating** with **minimal crash reports**, ensuring a smooth and reliable user experience.

EDUCATION

Specialized in Software Development & Problem Solving
